Chapter 1

Namespace Index

1.1 Namespace List

Here is a list of all documented namespaces with brief descriptions:

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Chapter 4

Namespace Documentation

4.1   Package ADVIEWER

Namespaces

- package Account
- package BAL
- package DAL
- package Main
- package Manage
- package Member

Classes

- class Rss

    Summary description for Rss

4.2   Package ADVIEWER.Account

Classes

- class ChangePassword
- class Login
- class Register

4.3   Package ADVIEWER.BAL

Classes

- class AccountFunctions

    AccountFunctions.
- class JsonMaker
- class MemberFunctions

    MemberFunctions Class.
- class ShowAdvertisment

    ShowAdvertisment.

- class ShowUser

   ShowUser.
- class PublicFunctions

   PublicFunctions.
- class StateAndCitiesForReapeater

   StateAndCitiesForReapeater.
- class AssignorParent

   This class just make id for assignor classes.
- class AssignorTicket

   AssignorTicket.
- class AssignorRate

   AssignorRate.
- class AssignorUser

   AssignorUser.
- class AssignorAdvertisment

   AssignorAdvertisment.
- class AssignorGroup

   AssignorGroup.
- class AssignorStateCity

   AssignorStateCity.
- class AssignorMessage

   AssignorMessage.
- class AssignorComment

   AssignorComment.
- class AssignorUserMessage

   AssignorUserMessage.
- class FilesStatus
- class FileTransferHandler
- class Thumbnail

4.4   Package ADVIEWER.DAL

Classes

- class ModelContainer

   No Metadata Documentation available.
- class AdvertisementMessage

   No Metadata Documentation available.
- class Advertisment

   No Metadata Documentation available.
- class Comment

   No Metadata Documentation available.
- class ContactMessage

   No Metadata Documentation available.
- class Group

   No Metadata Documentation available.
- class KeyWord

   No Metadata Documentation available.
- class Message

   No Metadata Documentation available.

- class Payment

    No Metadata Documentation available.
- class Rate

    No Metadata Documentation available.
- class StateCity

    No Metadata Documentation available.
- class Ticket

    No Metadata Documentation available.
- class User

    No Metadata Documentation available.
- class UserMessage

    No Metadata Documentation available.

4.5 Package ADVIEWER.Main

Classes

- class _404
- class About
- class AdvContent
- class _Default
- class Global
- class MainMaster
- class Profile
- class RatingHandler

    Summary description for RatingHandler
- class ShowGroupAdvs
- class ShowStateAdvs
- class StateCityList

4.6 Package ADVIEWER.Manage

Classes

- class AdReport
- class CommentsList
- class Default
- class EditGroup
- class EditStateCity
- class GroupsList
- class ManageMaster
- class SearchUser
- class StatesCitiesList
- class Tickets
- class UnconfirmedAdvs
- class UserReport
- class ViewComment
- class ViewTicket

4.7 Package ADVIEWER.Member

Classes

- class AddNewAdv
- class AddNewTicket
- class AdvsList
- class Avatar
- class EditProfile
- class ManageAdvGallery
- class MemberDefault
- class MemberMaster
- class RecieveMessagesInbox
- class SendMessagesInbox
- class SendMessageToUsers
- class SpecialAdvprivileges
- class TicketsList
- class ViewMessage
- class ViewTicket

Chapter 5

Class Documentation

5.1 ADVIEWER.Main._404 Class Reference

Inheritance diagram for ADVIEWER.Main._404:

```
┌─────────────────────────┐

             ▲
             │
┌─────────────────────────┐
│   ADVIEWER.Main._404     │
└─────────────────────────┘
```

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)

The documentation for this class was generated from the following file:

- 404.aspx.cs

5.2 ADVIEWER.Main._Default Class Reference

Inheritance diagram for ADVIEWER.Main._Default:
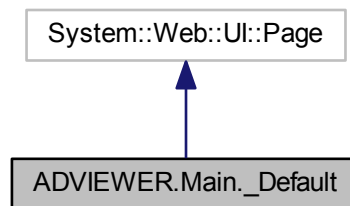

Collaboration diagram for ADVIEWER.Main._Default:
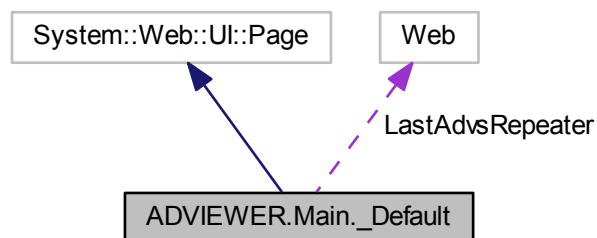

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.WebControls.Repeater LastAdvsRepeater
    LastAdvsRepeater control.

5.2.1 Member Data Documentation

5.2.1.1 **global.System.Web.UI.WebControls.Repeater ADVIEWER.Main._Default.LastAdvsRepeater** `[protected]`

LastAdvsRepeater control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Default.aspx.cs
- Default.aspx.designer.cs

5.3   ADVIEWER.Main.About Class Reference

Inheritance diagram for ADVIEWER.Main.About:
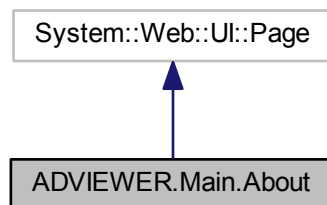

Collaboration diagram for ADVIEWER.Main.About:
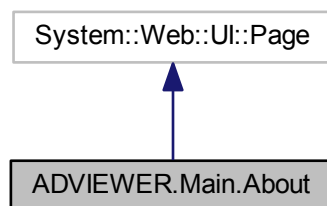

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)

The documentation for this class was generated from the following file:

- About.aspx.cs

5.4 ADVIEWER.BAL.AccountFunctions Class Reference

AccountFunctions.

Static Public Member Functions

- static bool newUser (Guid UserId, string UserFullName, string mail)

  newUser
- static void SetLastLogin (Guid UserId)

  SetLastLogin.
- static int currentUserId ()

  currentUserId
- static AssignorUser GetUserInformation (int UserID)

  GetUserInformation.
- static void UpdateUserInfo (Int32 id, String fullName, String about, String address, String fax, String mobile, String tell, String yahooId, String favgroups)

  UpdateUserInfo.
- static bool IsManager ()

  IsManager.

5.4.1 Detailed Description

AccountFunctions.

this class represents the functions for work with membership.

5.4.2 Member Function Documentation

5.4.2.1 static int ADVIEWER.BAL.AccountFunctions.currentUserId ( ) `[inline],[static]`

currentUserId

return the id of logged in user. return -1 if no user logged in.

5.4.2.2 static AssignorUser ADVIEWER.BAL.AccountFunctions.GetUserInformation (int *UserID*) `[inline],` `[static]`

GetUserInformation.

return the data of specific user that its id passed to this function.

5.4.2.3 static bool ADVIEWER.BAL.AccountFunctions.IsManager ( ) `[inline],[static]`

IsManager.

if logged in user is manager return true, otherwise return false.

5.4.2.4 static bool ADVIEWER.BAL.AccountFunctions.newUser (Guid *UserId,* string *UserFullName,* string *mail*) `[inline],[static]`

newUser

make new user in both databases.

5.4.2.5   static void ADVIEWER.BAL.AccountFunctions.SetLastLogin (Guid *UserId*) `[inline],[static]`

SetLastLogin.

set last login property of user class when specific user loged in.

5.4.2.6   static void ADVIEWER.BAL.AccountFunctions.UpdateUserInfo (Int32 *id,* String *fullName,* String *about,* String *address,* String *fax,* String *mobile,* String *tell,* String *yahoold,* String *favgroups*) `[inline],[static]`

UpdateUserInfo.

update datas of specific user with fields that passed to it.

The documentation for this class was generated from the following file:

- BAL/AccountFunctions.cs

5.5   ADVIEWER.Member.AddNewAdv Class Reference

Inheritance diagram for ADVIEWER.Member.AddNewAdv:
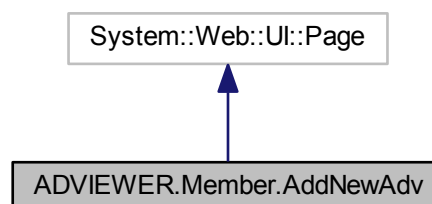

Collaboration diagram for ADVIEWER.Member.AddNewAdv:
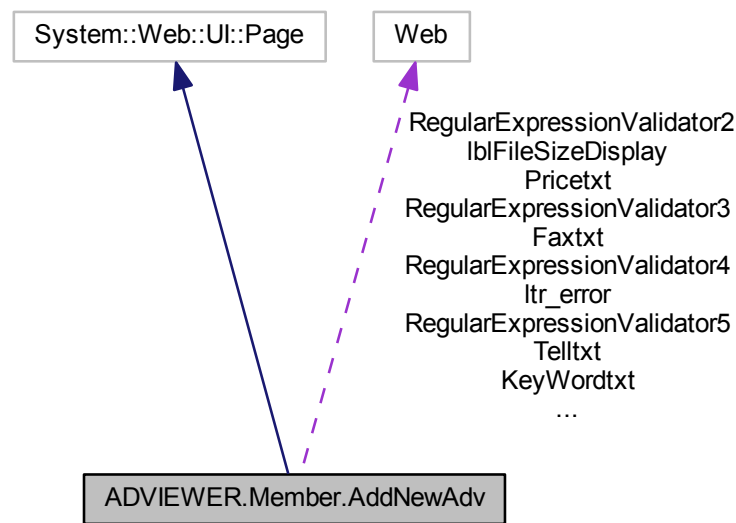

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)
- void **Button1_Click** (object sender, EventArgs e)
- void **AsyncFileUpload1_UploadedComplete** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.WebControls.Literal SuccessMessage

    SuccessMessage control.
- global::System.Web.UI.WebControls.Literal ltr_error

    ltr_error control.
- global::System.Web.UI.WebControls.DropDownList AdvKindDrop

    AdvKindDrop control.
- global::System.Web.UI.WebControls.DropDownList MonthDrop

    MonthDrop control.
- global::System.Web.UI.WebControls.DropDownList groupsDropDownList

    groupsDropDownList control.
- global::System.Web.UI.WebControls.DropDownList StateCityDropDownList

    StateCityDropDownList control.
- global::System.Web.UI.WebControls.TextBox AdvTitleTxt

    AdvTitleTxt control.
- global::System.Web.UI.WebControls.RequiredFieldValidator RequiredFieldValidator1

    RequiredFieldValidator1 control.
- global::System.Web.UI.WebControls.TextBox AdvShorttxt

    AdvShorttxt control.
- global::System.Web.UI.WebControls.TextBox AdvTexttxt

          AdvTexttxt control.
- global::System.Web.UI.WebControls.RequiredFieldValidator RequiredFieldValidator2

          RequiredFieldValidator2 control.
- global::System.Web.UI.WebControls.TextBox KeyWordtxt

          KeyWordtxt control.
- global::System.Web.UI.WebControls.TextBox Pricetxt

          Pricetxt control.
- global::System.Web.UI.WebControls.RegularExpressionValidator RegularExpressionValidator3

          RegularExpressionValidator3 control.
- global::System.Web.UI.WebControls.TextBox Linktxt

          Linktxt control.
- global::AjaxControlToolkit.ToolkitScriptManager ToolkitScriptManager1

          ToolkitScriptManager1 control.
- global::AjaxControlToolkit.AsyncFileUpload AsyncFileUpload1

          AsyncFileUpload1 control.
- global::System.Web.UI.WebControls.Image imgLoader

          imgLoader control.
- global::System.Web.UI.WebControls.Label lblErrorStatus

          lblErrorStatus control.
- global::System.Web.UI.WebControls.Label lblMesg

          lblMesg control.
- global::System.Web.UI.WebControls.Label lblSuccess

          lblSuccess control.
- global::System.Web.UI.WebControls.Label lblFileName

          lblFileName control.
- global::System.Web.UI.WebControls.Label lblFileNameDisplay

          lblFileNameDisplay control.
- global::System.Web.UI.WebControls.Label lblFileSize

          lblFileSize control.
- global::System.Web.UI.WebControls.Label lblFileSizeDisplay

          lblFileSizeDisplay control.
- global::System.Web.UI.WebControls.Label lblContentType

          lblContentType control.
- global::System.Web.UI.WebControls.Label lblContentTypeDisplay

          lblContentTypeDisplay control.
- global::System.Web.UI.WebControls.TextBox Nametxt

          Nametxt control.
- global::System.Web.UI.WebControls.RequiredFieldValidator RequiredFieldValidator4

          RequiredFieldValidator4 control.
- global::System.Web.UI.WebControls.TextBox Mobiletxt

          Mobiletxt control.
- global::System.Web.UI.WebControls.RegularExpressionValidator RegularExpressionValidator4

          RegularExpressionValidator4 control.
- global::System.Web.UI.WebControls.TextBox Telltxt

          Telltxt control.
- global::System.Web.UI.WebControls.RegularExpressionValidator RegularExpressionValidator5

          RegularExpressionValidator5 control.
- global::System.Web.UI.WebControls.TextBox Faxtxt

          Faxtxt control.
- global::System.Web.UI.WebControls.TextBox TellTimetxt

          TellTimetxt control.

- global::System.Web.UI.WebControls.TextBox Emailtxt

    Emailtxt control.

- global::System.Web.UI.WebControls.RequiredFieldValidator RequiredFieldValidator3

    RequiredFieldValidator3 control.

- global::System.Web.UI.WebControls.RegularExpressionValidator RegularExpressionValidator1

    RegularExpressionValidator1 control.

- global::System.Web.UI.WebControls.TextBox YahooIDtxt

    YahooIDtxt control.

- global::System.Web.UI.WebControls.RegularExpressionValidator RegularExpressionValidator2

    RegularExpressionValidator2 control.

- global::System.Web.UI.WebControls.TextBox Addresstxt

    Addresstxt control.

- global::System.Web.UI.WebControls.Button Button1

    Button1 control.

5.5.1 Member Data Documentation

5.5.1.1 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Addresstxt `[protected]`

Addresstxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.2 global.System.Web.UI.WebControls.DropDownList ADVIEWER.Member.AddNewAdv.AdvKindDrop `[protected]`

AdvKindDrop control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.3 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.AdvShorttxt `[protected]`

AdvShorttxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.4 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.AdvTexttxt `[protected]`

AdvTexttxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.5 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.AdvTitleTxt `[protected]`

AdvTitleTxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.6 global.AjaxControlToolkit.AsyncFileUpload ADVIEWER.Member.AddNewAdv.AsyncFileUpload1 `[protected]`

AsyncFileUpload1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.7 global.System.Web.UI.WebControls.Button ADVIEWER.Member.AddNewAdv.Button1 `[protected]`

Button1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.8 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Emailtxt `[protected]`

Emailtxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.9 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Faxtxt `[protected]`

Faxtxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.10 global.System.Web.UI.WebControls.DropDownList ADVIEWER.Member.AddNewAdv.groupsDropDownList `[protected]`

groupsDropDownList control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.11 global.System.Web.UI.WebControls.Image ADVIEWER.Member.AddNewAdv.imgLoader `[protected]`

imgLoader control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.12 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.KeyWordtxt `[protected]`

KeyWordtxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.13 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblContentType `[protected]`

lblContentType control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.14 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblContentTypeDisplay `[protected]`

lblContentTypeDisplay control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.15 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblErrorStatus `[protected]`

lblErrorStatus control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.16 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblFileName `[protected]`

lblFileName control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.17 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblFileNameDisplay `[protected]`

lblFileNameDisplay control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.18 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblFileSize `[protected]`

lblFileSize control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.19 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblFileSizeDisplay `[protected]`

lblFileSizeDisplay control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.20 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblMesg `[protected]`

lblMesg control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.21 global.System.Web.UI.WebControls.Label ADVIEWER.Member.AddNewAdv.lblSuccess `[protected]`

lblSuccess control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.22 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Linktxt `[protected]`

Linktxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.23 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.AddNewAdv.ltr_error `[protected]`

ltr_error control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.24 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Mobiletxt `[protected]`

Mobiletxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.25 global.System.Web.UI.WebControls.DropDownList ADVIEWER.Member.AddNewAdv.MonthDrop `[protected]`

MonthDrop control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.26 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Nametxt `[protected]`

Nametxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.27 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Pricetxt `[protected]`

Pricetxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.28 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.AddNewAdv.RegularExpression-Validator1 `[protected]`

RegularExpressionValidator1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.29 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.AddNewAdv.RegularExpression-Validator2 `[protected]`

RegularExpressionValidator2 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.30 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.AddNewAdv.RegularExpression-Validator3 `[protected]`

RegularExpressionValidator3 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.31 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.AddNewAdv.RegularExpression-Validator4 `[protected]`

RegularExpressionValidator4 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.32 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.AddNewAdv.RegularExpression-Validator5 `[protected]`

RegularExpressionValidator5 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.33 global.System.Web.UI.WebControls.RequiredFieldValidator ADVIEWER.Member.AddNewAdv.RequiredFieldValidator1 `[protected]`

RequiredFieldValidator1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.34 global.System.Web.UI.WebControls.RequiredFieldValidator ADVIEWER.Member.AddNewAdv.RequiredFieldValidator2 `[protected]`

RequiredFieldValidator2 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.35 global.System.Web.UI.WebControls.RequiredFieldValidator ADVIEWER.Member.AddNewAdv.RequiredFieldValidator3 `[protected]`

RequiredFieldValidator3 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.36 global.System.Web.UI.WebControls.RequiredFieldValidator ADVIEWER.Member.AddNewAdv.RequiredFieldValidator4 `[protected]`

RequiredFieldValidator4 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.37 global.System.Web.UI.WebControls.DropDownList ADVIEWER.Member.AddNewAdv.StateCityDropDownList `[protected]`

StateCityDropDownList control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.38 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.AddNewAdv.SuccessMessage `[protected]`

SuccessMessage control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.39 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.TellTimetxt `[protected]`

TellTimetxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.40 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.Telltxt `[protected]`

Telltxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.41 global.AjaxControlToolkit.ToolkitScriptManager ADVIEWER.Member.AddNewAdv.ToolkitScriptManager1
`[protected]`

ToolkitScriptManager1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.5.1.42 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewAdv.YahooIDtxt `[protected]`

YahooIDtxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Member/AddNewAdv.aspx.cs

- Member/AddNewAdv.aspx.designer.cs

5.6 ADVIEWER.Member.AddNewTicket Class Reference

Inheritance diagram for ADVIEWER.Member.AddNewTicket:
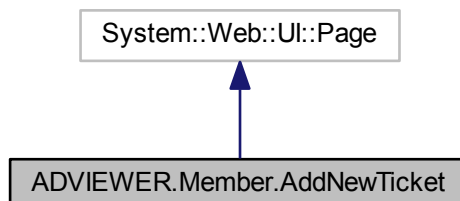

Collaboration diagram for ADVIEWER.Member.AddNewTicket:
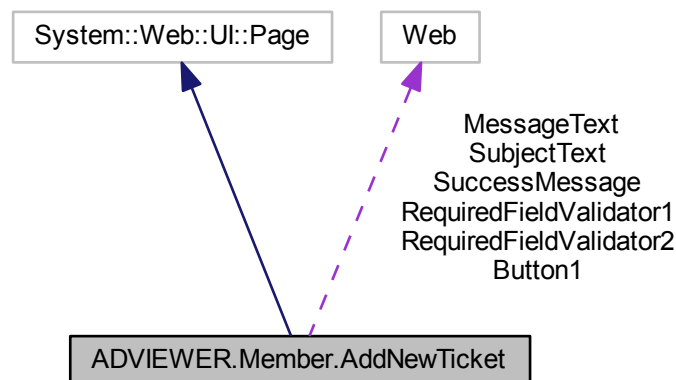

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)
- void **Button1_Click** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.WebControls.Literal SuccessMessage

  SuccessMessage control.
- global::System.Web.UI.WebControls.TextBox SubjectText

  SubjectText control.
- global::System.Web.UI.WebControls.RequiredFieldValidator RequiredFieldValidator1

  RequiredFieldValidator1 control.
- global::System.Web.UI.WebControls.TextBox MessageText

  MessageText control.
- global::System.Web.UI.WebControls.RequiredFieldValidator RequiredFieldValidator2

  RequiredFieldValidator2 control.
- global::System.Web.UI.WebControls.Button Button1

  Button1 control.

5.6.1 Member Data Documentation

5.6.1.1 global.System.Web.UI.WebControls.Button ADVIEWER.Member.AddNewTicket.Button1 `[protected]`

Button1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.6.1.2 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewTicket.MessageText `[protected]`

MessageText control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.6.1.3 global.System.Web.UI.WebControls.RequiredFieldValidator ADVIEWER.Member.AddNewTicket.RequiredFieldValidator1 `[protected]`

RequiredFieldValidator1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.6.1.4 global.System.Web.UI.WebControls.RequiredFieldValidator ADVIEWER.Member.AddNewTicket.RequiredFieldValidator2 `[protected]`

RequiredFieldValidator2 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.6.1.5 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.AddNewTicket.SubjectText `[protected]`

SubjectText control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.6.1.6 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.AddNewTicket.SuccessMessage `[protected]`

SuccessMessage control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Member/AddNewTicket.aspx.cs
- Member/AddNewTicket.aspx.designer.cs

5.7 ADVIEWER.Manage.AdReport Class Reference

Inheritance diagram for ADVIEWER.Manage.AdReport:
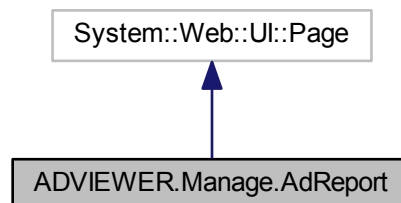

Collaboration diagram for ADVIEWER.Manage.AdReport:

Public Attributes

- int **freeAdvsCount**

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)

    StartDateY control.
- global::System.Web.UI.WebControls.Label Label3

    Label3 control.
- global::System.Web.UI.WebControls.TextBox StartDateM

    StartDateM control.
- global::System.Web.UI.WebControls.Label Label4

    Label4 control.

- global::System.Web.UI.WebControls.TextBox StartDateD

     StartDateD control.
- global::System.Web.UI.WebControls.Label Label2

     Label2 control.
- global::System.Web.UI.WebControls.TextBox EndDateY

     EndDateY control.
- global::System.Web.UI.WebControls.Label Label5

     Label5 control.
- global::System.Web.UI.WebControls.TextBox EndDateM

     EndDateM control.
- global::System.Web.UI.WebControls.Label Label6

     Label6 control.
- global::System.Web.UI.WebControls.TextBox EndDateD

     EndDateD control.
- global::System.Web.UI.WebControls.Button Button1

     Button1 control.
- global::System.Web.UI.WebControls.GridView staredAdvsGridView

     staredAdvsGridView control.
- global::System.Web.UI.WebControls.GridView FreeAdvsGridView

     FreeAdvsGridView control.

5.7.1 Member Data Documentation

5.7.1.1 global.System.Web.UI.WebControls.Button ADVIEWER.Manage.AdReport.Button1 `[protected]`

Button1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.2 global.System.Web.UI.WebControls.TextBox ADVIEWER.Manage.AdReport.EndDateD `[protected]`

EndDateD control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.3 global.System.Web.UI.WebControls.TextBox ADVIEWER.Manage.AdReport.EndDateM `[protected]`

EndDateM control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.4 global.System.Web.UI.WebControls.TextBox ADVIEWER.Manage.AdReport.EndDateY `[protected]`

EndDateY control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.5 global.System.Web.UI.WebControls.GridView ADVIEWER.Manage.AdReport.FreeAdvsGridView `[protected]`

FreeAdvsGridView control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.6 global.System.Web.UI.WebControls.Label ADVIEWER.Manage.AdReport.Label1 `[protected]`

Label1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.7 global.System.Web.UI.WebControls.Label ADVIEWER.Manage.AdReport.Label2 `[protected]`

Label2 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.8 global.System.Web.UI.WebControls.Label ADVIEWER.Manage.AdReport.Label3 `[protected]`

Label3 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.9 global.System.Web.UI.WebControls.Label ADVIEWER.Manage.AdReport.Label4 `[protected]`

Label4 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.10 global.System.Web.UI.WebControls.Label ADVIEWER.Manage.AdReport.Label5 `[protected]`

Label5 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.11 global.System.Web.UI.WebControls.Label ADVIEWER.Manage.AdReport.Label6 `[protected]`

Label6 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.12 global.System.Web.UI.WebControls.GridView ADVIEWER.Manage.AdReport.staredAdvsGridView `[protected]`

staredAdvsGridView control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.13 global.System.Web.UI.WebControls.TextBox ADVIEWER.Manage.AdReport.StartDateD `[protected]`

StartDateD control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.14 global.System.Web.UI.WebControls.TextBox ADVIEWER.Manage.AdReport.StartDateM `[protected]`

StartDateM control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.7.1.15 global.System.Web.UI.WebControls.TextBox ADVIEWER.Manage.AdReport.StartDateY `[protected]`

StartDateY control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

5.10.1 Detailed Description

No Metadata Documentation available.

5.10.2 Member Function Documentation

5.10.2.1 static **Advertisment ADVIEWER.DAL.Advertisment.CreateAdvertisment (** global::System.Int32 *id,* global::System.Int32 *groupID,* global::System.Int32 *starCount,* global::System.String *title,* global::System.String *description,* global::System.String *fullName,* global::System.String *email,* global::System.DateTime *expirationDate,* global::System.DateTime *registrationDate,* global::System.DateTime *lastRenewal,* global::System.Int32 *reviewCount,* global::System.String *tellTime,* global::System.Int32 *advDuration,* global::System.Int32 *userId* **)** `[inline]`, `[static]`

Create a new Advertisment object.

Parameters

id	Initial value of the ID property.
groupID	Initial value of the GroupID property.
starCount	Initial value of the StarCount property.
title	Initial value of the Title property.
description	Initial value of the Description property.

fullName	Initial value of the FullName property.
email	Initial value of the Email property.
expirationDate	Initial value of the ExpirationDate property.
registrationDate	Initial value of the RegistrationDate property.
lastRenewal	Initial value of the LastRenewal property.
reviewCount	Initial value of the ReviewCount property.
tellTime	Initial value of the TellTime property.
advDuration	Initial value of the AdvDuration property.
userId	Initial value of the UserId property.

- DateTime **RegistrationDate** [get, set]
- AssignorUser **User** [get]
- int **SenderID** [get, set]
- string **Email** [get, set]

5.15.1 Detailed Description

AssignorMessage.

This class make Assignor Message. assignor classes are used to transfer data between DAL and UI.

The documentation for this class was generated from the following file:

- BAL/PublicFunctions.cs

5.16 ADVIEWER.BAL.AssignorParent Class Reference

This class just make id for assignor classes.

Inheritance diagram for ADVIEWER.BAL.AssignorParent:

Properties

- int **ID** `[get, set]`

5.16.1 Detailed Description

This class just make id for assignor classes.

This class just make id

The documentation for this class was generated from the following file:

- BAL/PublicFunctions.cs

5.17 ADVIEWER.BAL.AssignorRate Class Reference

AssignorRate.

Inheritance diagram for ADVIEWER.BAL.AssignorRate:

Collaboration diagram for ADVIEWER.BAL.AssignorRate:
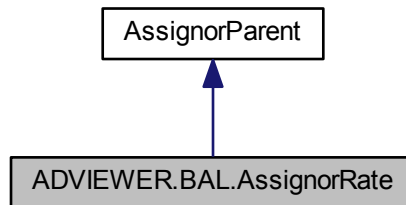

Properties

- int **AdvertismentId** `[get, set]`
- Single **Value** `[get, set]`

5.17.1 Detailed Description

AssignorRate.

This class make Assignor Rate. assignor classes are used to transfer data between DAL and UI.

The documentation for this class was generated from the following file:
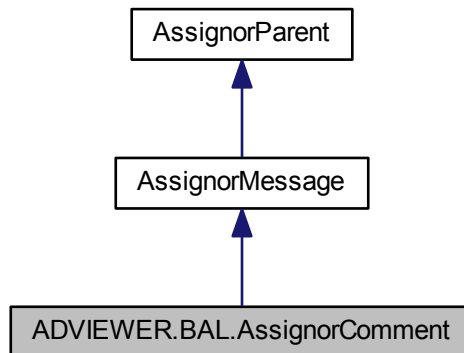

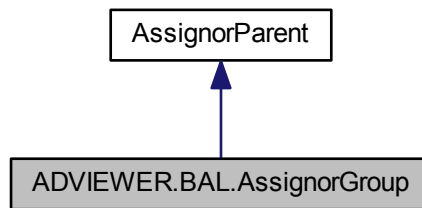

- BAL/PublicFunctions.cs

5.18 ADVIEWER.BAL.AssignorStateCity Class Reference

AssignorStateCity.

Inheritance diagram for ADVIEWER.BAL.AssignorStateCity:

Collaboration diagram for ADVIEWER.BAL.AssignorStateCity:

```
        ┌─────────────────┐
        │  AssignorParent  │
        └─────────────────┘
                 ▲
                 │
  ┌───────────────────────────────────┐
  │  ADVIEWER.BAL.AssignorStateCity    │
  └───────────────────────────────────┘
```
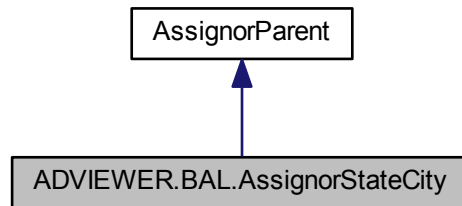

Properties

- string **Name** `[get, set]`
- int **StateId** `[get, set]`
- AssignorStateCity **State** `[get]`

5.18.1 Detailed Description

AssignorStateCity.

This class make Assignor State and City. assignor classes are used to transfer data between DAL and UI.

The documentation for this class was generated from the following file:
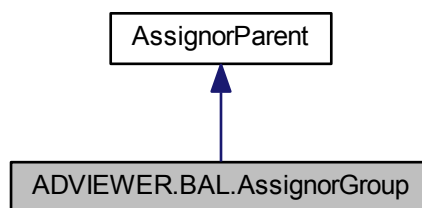

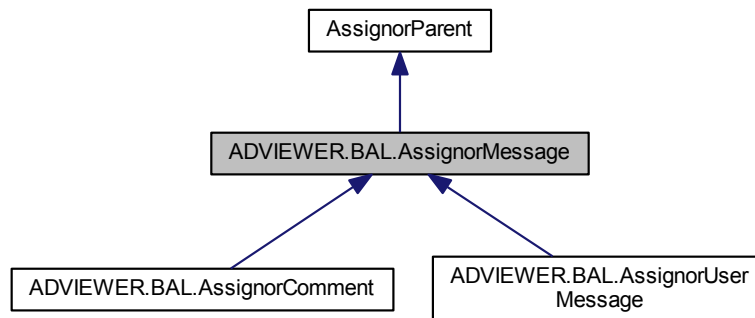

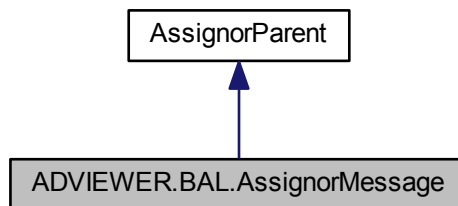

- BAL/PublicFunctions.cs

5.19 ADVIEWER.BAL.AssignorTicket Class Reference

AssignorTicket.

Inheritance diagram for ADVIEWER.BAL.AssignorTicket:

```
        ┌─────────────────┐
        │  AssignorParent  │
        └─────────────────┘
                 ▲

  ┌───────────────────────────────────┐
  │  ADVIEWER.BAL.AssignorTicket       │
  └───────────────────────────────────┘
```

Collaboration diagram for ADVIEWER.BAL.AssignorTicket:

```
              ┌──────────────────┐
              │  AssignorParent  │
              └──────────────────┘
                        ▲
                        │
              ┌──────────────────────────────┐
              │ ADVIEWER.BAL.AssignorTicket  │
              └──────────────────────────────┘
```

Properties

- string **Answer** [get, set]
- DateTime **LastUpdate** [get, set]
- DateTime **RegDate** [get, set]
- string **Text** [get, set]
- string **Title** [get, set]
- int **UserID** [get, set]
- AssignorUser **User** [get]

5.19.1 Detailed Description

AssignorTicket.

This class make assignor Ticket. assignor classes are used to transfer data between DAL and UI.

The documentation for this class was generated from the following file:

- BAL/PublicFunctions.cs

5.20 ADVIEWER.BAL.AssignorUser Class Reference

AssignorUser.

Properties

- int **ID** [get, set]
- AssignorGroup[] **Groups** [get]
- string **About** [get, set]
- string **Address** [get, set]
- string **Fax** [get, set]
- string **FullName** [get, set]
- string **Mail** [get, set]
- string **Mobile** [get, set]
- string **PicAddress** [get, set]
- string **Tell** [get, set]
- string **YahooID** [get, set]
- DateTime **RegisterDate** [get, set]

5.20.1 Detailed Description

AssignorUser.

This class make Assignor User. assignor classes are used to transfer data between DAL and UI.
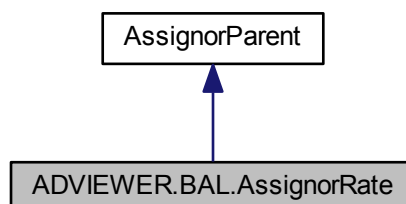

The documentation for this class was generated from the following file:
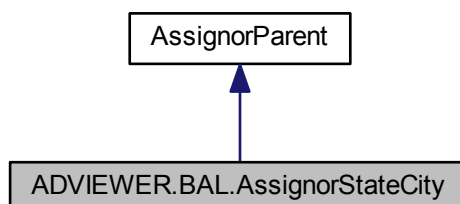

- BAL/PublicFunctions.cs

5.21 ADVIEWER.BAL.AssignorUserMessage Class Reference

AssignorUserMessage.

Inheritance diagram for ADVIEWER.BAL.AssignorUserMessage:
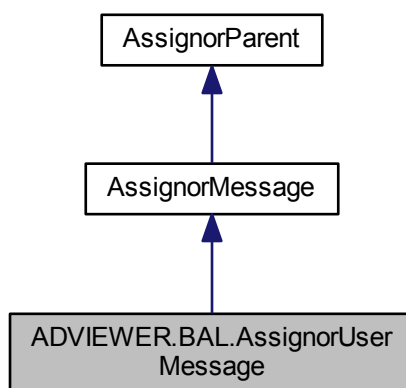

Collaboration diagram for ADVIEWER.BAL.AssignorUserMessage:
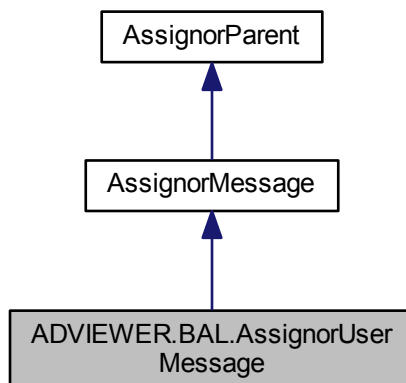

Properties

- AssignorUser **User** `[get]`

- int **RecieverID** `[get, set]`

5.21.1 Detailed Description

AssignorUserMessage.

This class make Assignor User Message. assignor classes are used to transfer data between DAL and UI.

The documentation for this class was generated from the following file:
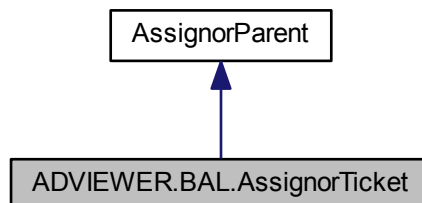

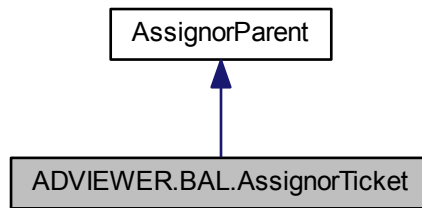

- BAL/PublicFunctions.cs

5.22 ADVIEWER.Member.Avatar Class Reference

Inheritance diagram for ADVIEWER.Member.Avatar:
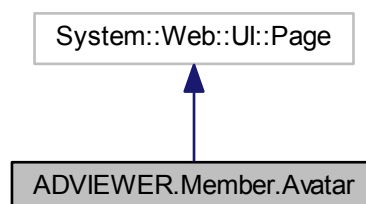

Collaboration diagram for ADVIEWER.Member.Avatar:
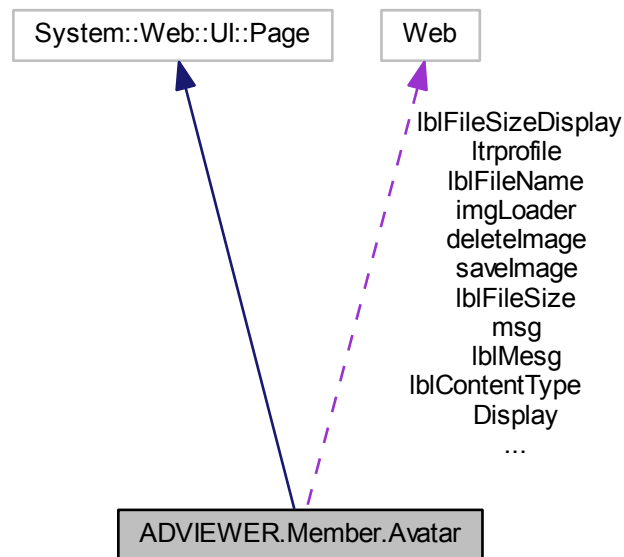

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)
- void **SaveImage_Click** (object sender, EventArgs e)
- void **AsyncImageUpload_UploadedComplete** (object sender, EventArgs e)
- void **deleteImage_Click** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.HtmlControls.HtmlGenericControl msg

    msg control.
- global::System.Web.UI.WebControls.Literal ltrprofile

    ltrprofile control.
- global::AjaxControlToolkit.ToolkitScriptManager ToolkitScriptManager1

    ToolkitScriptManager1 control.
- global::AjaxControlToolkit.AsyncFileUpload AsyncImageUpload

    AsyncImageUpload control.
- global::System.Web.UI.WebControls.Image imgLoader

    imgLoader control.
- global::System.Web.UI.WebControls.Label lblErrorStatus

    lblErrorStatus control.
- global::System.Web.UI.WebControls.Label lblMesg

    lblMesg control.
- global::System.Web.UI.WebControls.Label lblSuccess

    lblSuccess control.
- global::System.Web.UI.WebControls.Label lblFileName

lblFileName control.

- global::System.Web.UI.WebControls.Label lblFileNameDisplay

    lblFileNameDisplay control.

- global::System.Web.UI.WebControls.Label lblFileSize

    lblFileSize control.

- global::System.Web.UI.WebControls.Label lblFileSizeDisplay

    lblFileSizeDisplay control.

- global::System.Web.UI.WebControls.Label lblContentType

    lblContentType control.

- global::System.Web.UI.WebControls.Label lblContentTypeDisplay

    lblContentTypeDisplay control.

- global::System.Web.UI.WebControls.Button saveImage

    saveImage control.

- global::System.Web.UI.WebControls.Button deleteImage

    deleteImage control.

5.22.1 Member Data Documentation

5.22.1.1 global.AjaxControlToolkit.AsyncFileUpload ADVIEWER.Member.Avatar.AsyncImageUpload `[protected]`

AsyncImageUpload control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.2 global.System.Web.UI.WebControls.Button ADVIEWER.Member.Avatar.deleteImage `[protected]`

deleteImage control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.3 global.System.Web.UI.WebControls.Image ADVIEWER.Member.Avatar.imgLoader `[protected]`

imgLoader control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.4 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblContentType `[protected]`

lblContentType control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.5 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblContentTypeDisplay `[protected]`

lblContentTypeDisplay control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.6 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblErrorStatus `[protected]`

lblErrorStatus control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.7 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblFileName `[protected]`

lblFileName control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.8 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblFileNameDisplay `[protected]`

lblFileNameDisplay control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.9 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblFileSize `[protected]`

lblFileSize control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.10 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblFileSizeDisplay `[protected]`

lblFileSizeDisplay control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.11 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblMesg `[protected]`

lblMesg control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.12 global.System.Web.UI.WebControls.Label ADVIEWER.Member.Avatar.lblSuccess `[protected]`

lblSuccess control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.13 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.Avatar.ltrprofile `[protected]`

ltrprofile control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.14 global.System.Web.UI.HtmlControls.HtmlGenericControl ADVIEWER.Member.Avatar.msg `[protected]`

msg control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.15 global.System.Web.UI.WebControls.Button ADVIEWER.Member.Avatar.saveImage `[protected]`

saveImage control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.22.1.16 global.AjaxControlToolkit.ToolkitScriptManager ADVIEWER.Member.Avatar.ToolkitScriptManager1
`[protected]`

ToolkitScriptManager1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Member/Avatar.aspx.cs
- Member/Avatar.aspx.designer.cs

5.23 ADVIEWER.Account.ChangePassword Class Reference

Inheritance diagram for ADVIEWER.Account.ChangePassword:
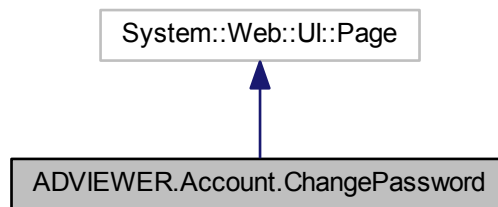

Collaboration diagram for ADVIEWER.Account.ChangePassword:
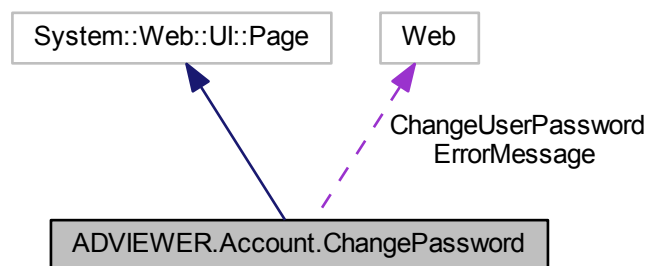

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)
- void **setError** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.WebControls.Literal ErrorMessage

    ErrorMessage control.

- global::System.Web.UI.WebControls.ChangePassword ChangeUserPassword

    ChangeUserPassword control.

5.23.1 Member Data Documentation

5.23.1.1 global.System.Web.UI.WebControls.ChangePassword ADVIEWER.Account.ChangePassword.ChangeUserPassword [protected]

ChangeUserPassword control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.23.1.2 global.System.Web.UI.WebControls.Literal ADVIEWER.Account.ChangePassword.ErrorMessage [protected]

ErrorMessage control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Account/ChangePassword.aspx.cs
- Account/ChangePassword.aspx.designer.cs

5.24 ADVIEWER.DAL.Comment Class Reference

No Metadata Documentation available.

Inheritance diagram for ADVIEWER.DAL.Comment:
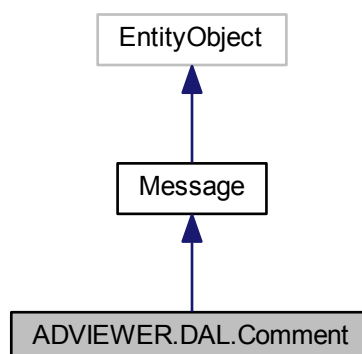

Collaboration diagram for ADVIEWER.DAL.Comment:
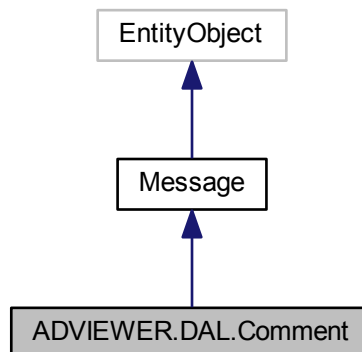

Static Public Member Functions

- static Comment CreateComment (global::System.Int32 id, global::System.String text, global::System.Date-Time registrationDate, global::System.Int32 advID)

    Create a new Comment object.

Properties

- global::System.Int32 AdvID `[get, set]`

    No Metadata Documentation available.
- global::System.Boolean IsConfirmed `[get, set]`

    No Metadata Documentation available.
- Advertisment Advertisment `[get, set]`

    No Metadata Documentation available.
- EntityReference< Advertisment > AdvertismentReference `[get, set]`

    No Metadata Documentation available.

5.24.1 Detailed Description

No Metadata Documentation available.

5.24.2 Member Function Documentation

5.24.2.1 static Comment ADVIEWER.DAL.Comment.CreateComment (global::System.Int32 *id,* global::System.String *text,* global::System.DateTime *registrationDate,* global::System.Int32 *advID*) `[inline],[static]`

Create a new Comment object.

Parameters

id	Initial value of the ID property.
text	Initial value of the Text property.
registrationDate	Initial value of the RegistrationDate property.
advID	Initial value of the AdvID property.

5.24.3 Property Documentation

5.24.3.1 Advertisment ADVIEWER.DAL.Comment.Advertisment `[get],[set]`

No Metadata Documentation available.

5.24.3.2 EntityReference<Advertisment> ADVIEWER.DAL.Comment.AdvertismentReference `[get],[set]`

No Metadata Documentation available.

5.24.3.3 global.System.Int32 ADVIEWER.DAL.Comment.AdvID `[get],[set]`

No Metadata Documentation available.

5.24.3.4 global.System.Boolean ADVIEWER.DAL.Comment.IsConfirmed `[get],[set]`

No Metadata Documentation available.

The documentation for this class was generated from the following file:

- DAL/Model1.Designer.cs

5.25 ADVIEWER.Manage.CommentsList Class Reference

Inheritance diagram for ADVIEWER.Manage.CommentsList:
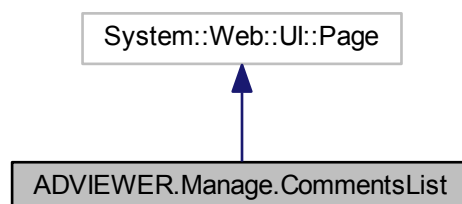

Collaboration diagram for ADVIEWER.Manage.CommentsList:
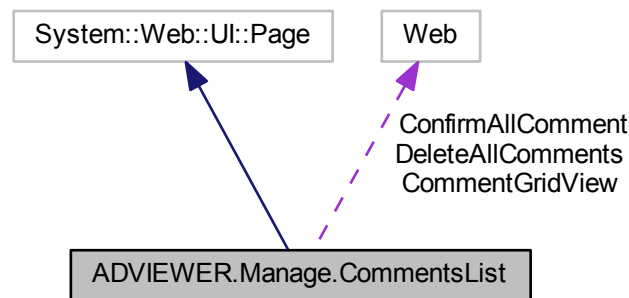

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)
- void **CommentGridView_RowCommand** (object sender, GridViewCommandEventArgs e)
- void **DeleteSelectedComments** (object sender, EventArgs e)
- void **ConfirmSelectedComments** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.WebControls.GridView CommentGridView

    CommentGridView control.

- global::System.Web.UI.WebControls.LinkButton DeleteAllComments

    DeleteAllComments control.

- global::System.Web.UI.WebControls.LinkButton ConfirmAllComment

    ConfirmAllComment control.

5.25.1 Member Data Documentation

5.25.1.1 global.System.Web.UI.WebControls.GridView ADVIEWER.Manage.CommentsList.CommentGridView
`[protected]`

CommentGridView control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.25.1.2 global.System.Web.UI.WebControls.LinkButton ADVIEWER.Manage.CommentsList.ConfirmAllComment
`[protected]`

ConfirmAllComment control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.25.1.3 global.System.Web.UI.WebControls.LinkButton ADVIEWER.Manage.CommentsList.DeleteAllComments
        `[protected]`

DeleteAllComments control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Manage/CommentsList.aspx.cs
- Manage/CommentsList.aspx.designer.cs

5.26   ADVIEWER.DAL.ContactMessage Class Reference

No Metadata Documentation available.

Inheritance diagram for ADVIEWER.DAL.ContactMessage:
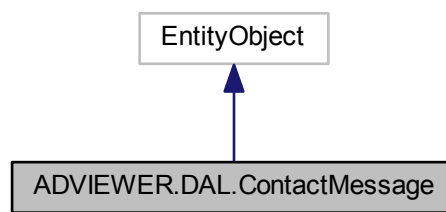

Collaboration diagram for ADVIEWER.DAL.ContactMessage:
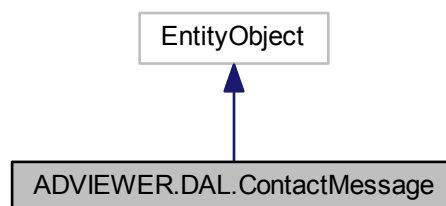

Static Public Member Functions

- static ContactMessage CreateContactMessage (global::System.Int32 id)

    Create a new ContactMessage object.

Properties

- global::System.Int32 ID `[get, set]`

  No Metadata Documentation available.
- global::System.String FulName `[get, set]`

  No Metadata Documentation available.
- global::System.String Email `[get, set]`

  No Metadata Documentation available.

   txtYahoo control.
- global::System.Web.UI.WebControls.RegularExpressionValidator RegularExpressionValidator1

   RegularExpressionValidator1 control.
- global::System.Web.UI.WebControls.TextBox txtAbout

   txtAbout control.
- global::System.Web.UI.WebControls.TextBox txtAddress

   txtAddress control.
- global::System.Web.UI.WebControls.Button Button1

   Button1 control.

5.29.1 Member Data Documentation

5.29.1.1 global.System.Web.UI.WebControls.Button ADVIEWER.Member.EditProfile.Button1 `[protected]`

Button1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.2 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.FavGrouptxt `[protected]`

FavGrouptxt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.3 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.EditProfile.ltrmail `[protected]`

ltrmail control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.4 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.EditProfile.ltrprofile `[protected]`

ltrprofile control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.5 global.System.Web.UI.HtmlControls.HtmlGenericControl ADVIEWER.Member.EditProfile.msg `[protected]`

msg control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.6 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.EditProfile.RegularExpression-Validator1 `[protected]`

RegularExpressionValidator1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.7 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.EditProfile.RegularExpression-Validator4 `[protected]`

RegularExpressionValidator4 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.8 global.System.Web.UI.WebControls.RegularExpressionValidator ADVIEWER.Member.EditProfile.RegularExpression-Validator5 `[protected]`

RegularExpressionValidator5 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.9 global.System.Web.UI.WebControls.RequiredFieldValidator ADVIEWER.Member.EditProfile.RequiredFieldValidator2 `[protected]`

RequiredFieldValidator2 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.10 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.txtAbout `[protected]`

txtAbout control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.11 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.txtAddress `[protected]`

txtAddress control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.12 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.txtfax `[protected]`

txtfax control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.13 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.txtMob `[protected]`

txtMob control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.14 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.txtName `[protected]`

txtName control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.15 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.txtTell `[protected]`

txtTell control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.29.1.16 global.System.Web.UI.WebControls.TextBox ADVIEWER.Member.EditProfile.txtYahoo `[protected]`

txtYahoo control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.43.1 Detailed Description

MemberFunctions Class.

! This Class is For Functions used in member section, note that manager is a member

5.43.2 Member Function Documentation

5.43.2.1 static void ADVIEWER.BAL.MemberFunctions.AddNewGroup (string *groupName,* int? *parentId*) `[inline]`, `[static]`

AddNewGroup.

This function in a subclass to receive input data and creates a new subgroup.

5.43.2.2 **static void ADVIEWER.BAL.MemberFunctions.AddNewTicket (string** *text,* **string** *title,* **int** *userId* **)** `[inline],` `[static]`

AddNewTicket.

The function of a ticket will receive all the information it can store.

5.43.2.3 **static void ADVIEWER.BAL.MemberFunctions.AddNewUserMessages (string** *UsersList,* **string** *MessageContent* **)** `[inline],[static]`

AddNewUserMessages.

Add New User Messages to data base, the receivers passed to function by UsersList.

5.43.2.4 **static object ADVIEWER.BAL.MemberFunctions.AdReportNormal (string** *f,* **string** *l* **)** `[inline],[static]`

AdReportNormal.

This Function Return list of ad That Registered betwean f and l

5.43.2.5 **static object ADVIEWER.BAL.MemberFunctions.AdReportStar (string** *f,* **string** *l* **)** `[inline],[static]`

AdReportStar.

return count of Ad Star betwean f and l

5.43.2.6 **static void ADVIEWER.BAL.MemberFunctions.ConfirmAdvertisment (int** *AdvID* **)** `[inline],[static]`

ConfirmAdvertisment.

This function reads the characteristics of certified puts an ad equals true.

5.43.2.7 **static void ADVIEWER.BAL.MemberFunctions.ConfirmComment (int** *id* **)** `[inline],[static]`

ConfirmComment.

do the jobs tha t nessecery to confirm a comment

5.43.2.8 **static int ADVIEWER.BAL.MemberFunctions.CountAdReportNormal ( )** `[inline],[static]`

CountAdReportNormal.

return count of Ad Report Star

5.43.2.9 **static int ADVIEWER.BAL.MemberFunctions.CountAdReportStar ( )** `[inline],[static]`

CountAdReportStar.

return count of Ad Report Star

5.43.2.10 **static void ADVIEWER.BAL.MemberFunctions.DeleteAdv (int** *AdvID* **)** `[inline],[static]`

DeleteAdv.

This function receives an ad in the input id and it will be deleted from the database.

5.43.2.11 static void ADVIEWER.BAL.MemberFunctions.DeleteComment (int *CommentID*) `[inline],[static]`

DeleteComment.

This entry id in the function receives a comment and it will be deleted from the database.

5.43.2.12 static void ADVIEWER.BAL.MemberFunctions.deleteImage (int *userid*) `[inline],[static]`

deleteImage

This Function Remove image of a user

5.43.2.13 static void ADVIEWER.BAL.MemberFunctions.DeleteTicket (int *TicketID*) `[inline],[static]`

DeleteTicket.

This entry id in the function receives a ticket and it will be deleted from the database.

5.43.2.14 static void ADVIEWER.BAL.MemberFunctions.DenyAdvertisment (int *AdvID,* string *reason*) `[inline],` `[static]`

DenyAdvertisment.

do the jobs tha t nessecery to deny an advertisement

5.43.2.15 static AssignorAdvertisment [] ADVIEWER.BAL.MemberFunctions.GetAdvByGroupID (int *ID*) `[inline],` `[static]`

GetAdvByGroupID.

The entries will receive an ID and the ID of those that are advertising their GroupID is being input to output will be Brarbr.

5.43.2.16 static AssignorAdvertisment ADVIEWER.BAL.MemberFunctions.GetAdvertismentData (int *id*) `[inline],` `[static]`

GetAdvertismentData.

This function takes an advertiser id and all the information it returns.

5.43.2.17 static AssignorComment ADVIEWER.BAL.MemberFunctions.GetCommentData (int *id*) `[inline],` `[static]`

GetCommentData.

return the comment that it's id passed to its

5.43.2.18 static AssignorComment [] ADVIEWER.BAL.MemberFunctions.GetListCommentData ( ) `[inline],` `[static]`

GetListCommentData.

return the array of assignorComments orderd by its registration date

5.43.2.19   static List<**AssignorTicket**> **ADVIEWER.BAL.MemberFunctions.GetListTicketData (int** *id* **)** `[inline],` `[static]`

GetListTicketData.

This function takes a user id found it to be a function of all the ticket that was created by that person returns.

5.43.2.20   static AssignorTicket [] ADVIEWER.BAL.MemberFunctions.GetListTicketData ( ) `[inline],[static]`

GetListTicketData.

This function does not enter a value in the input list of ticket that will be the last update they will return back to REG.

5.43.2.21   static AssignorMessage ADVIEWER.BAL.MemberFunctions.GetMessageByID (int *MessageID* **)** `[inline],` `[static]`

GetRecieveMessageInboxDataSource.

return specific message that its ID passed to it.

5.43.2.22   static AssignorGroup [] ADVIEWER.BAL.MemberFunctions.GetParentGroups ( ) `[inline],[static]`

GetParentGroups.

This function will return all key subgroups such as Saipa car but do not open it.

5.43.2.23   static AssignorUserMessage [] ADVIEWER.BAL.MemberFunctions.GetRecieveMessageInboxDataSource (int *UserID* **)** `[inline],[static]`

GetRecieveMessageInboxDataSource.

return array of messages that specific user recived.

5.43.2.24   static AssignorUserMessage [] ADVIEWER.BAL.MemberFunctions.GetSendMessageInboxDataSource (int *UserID* **)** `[inline],[static]`

GetSendMessageInboxDataSource.

return array of messages that specific user sent.

5.43.2.25   static AssignorStateCity [] ADVIEWER.BAL.MemberFunctions.GetStateAndCityForDropDown ( ) `[inline],` `[static]`

GetStateAndCityForDropDown.

returns all states and cities

5.43.2.26   static AssignorGroup [] ADVIEWER.BAL.MemberFunctions.GetSubGroups ( ) `[inline],[static]`

GetSubGroups.

This function returns all sub-groups.

5.43.2.27 static AssignorGroup [] ADVIEWER.BAL.MemberFunctions.GetSubGroupsByID (int *ID*) `[inline],` `[static]`

GetSubGroupsByID.

This function get a group id after that return all sub grpup of that

5.43.2.28 static AssignorTicket ADVIEWER.BAL.MemberFunctions.GetTicketData (int *id*) `[inline],[static]`

GetTicketData.

This function returns a ticket id of that information.

5.43.2.29 static AssignorAdvertisment [] ADVIEWER.BAL.MemberFunctions.GetUserAdvs (int *UserID*) `[inline],` `[static]`

GetUserAdvs.

This function receives the input of personal id and insert advertising that person returns.

5.43.2.30 static AssignorAdvertisment [] ADVIEWER.BAL.MemberFunctions.GetUserConfirmedAdvs (int *UserID*) `[inline],[static]`

GetUserConfirmedAdvs.

This function receives the input of personal id and advertising inserts and confirmed that a person will return.

5.43.2.31 static string ADVIEWER.BAL.MemberFunctions.GetUserFavoriteGroups (int *UserID*) `[inline],[static]`

GetUserFavoriteGroups.

returns the string that used in auto complete field for user favorite groups field

5.43.2.32 static bool ADVIEWER.BAL.MemberFunctions.MakeNewAdvertisment (int *starCount,* int *advDuration,* string *title,* string *shortdescription,* string *description,* string *keywordStr,* string *price,* string *link,* string *fullName,* string *mobile,* string *tell,* string *telltime,* string *email,* string *yahooid,* string *address,* int *userId,* string *tempAdd,* string *mainAdd,* string *fileName,* int *groupId,* int *StateCityID*) `[inline],[static]`

MakeNewAdvertisment.

This returns all the data in the chart is an ad for it in the Keyword Abtza Id find them and if you did not have it on the table it will add it id allottable, and it's videos id the adds the information to advertisers. adding the image to the address given in the address information is saved ads

Here is the call graph for this function:

5.43.2.33 static int [] ADVIEWER.BAL.MemberFunctions.ParseKeyWords (string *keywordStr* **)** `[inline],[static]`

ParseKeyWords.

This function takes a string input and then it all on the field "," id separator and returns the entire category in the output. If you are not a member of keyword table, then it adds the keyword, and then returns the new id.

5.43.2.34 static void ADVIEWER.BAL.MemberFunctions.RenewAdv (int *ID* **)** `[inline],[static]`

RenewAdv.

This Functiun change atribute of ad that like new ad

5.43.2.35 static void ADVIEWER.BAL.MemberFunctions.SaveImage (string *tempAdd,* **string** *mainAdd,* **string** *filename* **)** `[inline],[static]`

SaveImage.

This is the first Czech to address is that if there is no input, it will generate and store the image at that address.

5.43.2.36 static void ADVIEWER.BAL.MemberFunctions.SetAdvRate (int *AdvId,* **Single** *Value* **)** `[inline],[static]`

SetAdvRate.

insert or update the value of rating an advertisement

5.43.2.37 static void ADVIEWER.BAL.MemberFunctions.setUserImage (string *tempAdd,* **string** *mainAdd,* **int** *userId,* **string** *fileName* **)** `[inline],[static]`

setUserImage

This Function Set User image !!!

5.43.2.38 static DataTable ADVIEWER.BAL.MemberFunctions.UnconfirmedFreeAdvertismentsDataTable ( ) `[inline], [static]`

UnconfirmedFreeAdvertismentsDataTable.

This function returns all the free advertising that have been approved

5.43.2.39 static object ADVIEWER.BAL.MemberFunctions.UnconfirmedStaredAdvertismentsDataTable ( ) `[inline], [static]`

UnconfirmedStaredAdvertismentsDataTable.

This function will return all ads starred that have been approved

5.43.2.40 static object ADVIEWER.BAL.MemberFunctions.UserDataTable (string *f,* **string** *l* **)** `[inline],[static]`

UserDataTable.

This Function Return list of user That login betwean f and l

5.43.2.41 static object ADVIEWER.BAL.MemberFunctions.UserDataTable2 (string *name,* string *mail,* string *id*)
```
[inline],[static]
```

UserDataTable2.

This Function Return list of user That have information name or mail or id

### 5.44.1   Member Data Documentation

#### 5.44.1.1   global.System.Web.UI.HtmlControls.HtmlForm ADVIEWER.Member.MemberMaster.form1   `[protected]`

form1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

#### 5.44.1.2   global.System.Web.UI.WebControls.Repeater ADVIEWER.Member.MemberMaster.GroupsRepeater   `[protected]`

GroupsRepeater control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

#### 5.44.1.3   global.System.Web.UI.WebControls.ContentPlaceHolder ADVIEWER.Member.MemberMaster.head   `[protected]`

head control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

**5.44.1.4 global.System.Web.UI.WebControls.LoginView ADVIEWER.Member.MemberMaster.HeadLoginView** `[protected]`

HeadLoginView control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

**5.44.1.5 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.MemberMaster.ltr_unpaid** `[protected]`

ltr_unpaid control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

**5.44.1.6 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.MemberMaster.ltr_username2** `[protected]`

ltr_username2 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

**5.44.1.7 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.MemberMaster.ltrprofile** `[protected]`

ltrprofile control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

**5.44.1.8 global.System.Web.UI.WebControls.ContentPlaceHolder ADVIEWER.Member.MemberMaster.mainContent** `[protected]`

mainContent control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

**5.44.1.9 global.System.Web.UI.WebControls.Literal ADVIEWER.Member.MemberMaster.ManagerPanel** `[protected]`

ManagerPanel control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

**5.44.1.10 global.System.Web.UI.HtmlControls.HtmlGenericControl ADVIEWER.Member.MemberMaster.statesDiv** `[protected]`

statesDiv control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Member/MemberMaster.Master.cs
- Member/MemberMaster.Master.designer.cs

## 5.45 ADVIEWER.DAL.Message Class Reference

No Metadata Documentation available.

Inheritance diagram for ADVIEWER.DAL.Message:

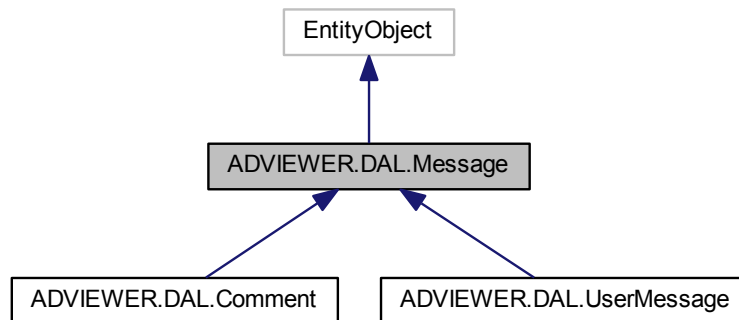

Collaboration diagram for ADVIEWER.DAL.Message:

## Static Public Member Functions

- static Message CreateMessage (global::System.Int32 id, global::System.String text, global::System.Date-Time registrationDate)

    *Create a new Message object.*

## Properties

- global::System.Int32 ID  [get, set]

    *No Metadata Documentation available.*
- global::System.String Text  [get, set]

    *No Metadata Documentation available.*
- global::System.DateTime RegistrationDate  [get, set]

### 5.45.1 Detailed Description

No Metadata Documentation available.

### 5.45.2 Member Function Documentation

**5.45.2.1 static Message ADVIEWER.DAL.Message.CreateMessage ( global::System.Int32 *id,* global::System.String *text,* global::System.DateTime *registrationDate* )** `[inline],[static]`

Create a new Message object.

**Parameters**

| | |
|---|---|
| *id* | Initial value of the ID property. |
| *text* | Initial value of the Text property. |
| *registrationDate* | Initial value of the RegistrationDate property. |

### 5.45.3 Property Documentation

**5.45.3.1 global.System.String ADVIEWER.DAL.Message.Email** `[get],[set]`

No Metadata Documentation available.

**5.45.3.2 global.System.Int32 ADVIEWER.DAL.Message.ID** `[get],[set]`

No Metadata Documentation available.

**5.45.3.3 global.System.DateTime ADVIEWER.DAL.Message.RegistrationDate** `[get],[set]`

No Metadata Documentation available.

**5.45.3.4 User ADVIEWER.DAL.Message.Sender** `[get],[set]`

No Metadata Documentation available.

**5.45.3.5 Nullable<global.System.Int32> ADVIEWER.DAL.Message.SenderID** `[get],[set]`

No Metadata Documentation available.

**5.45.3.6 EntityReference<User> ADVIEWER.DAL.Message.SenderReference** `[get],[set]`

No Metadata Documentation available.

**5.45.3.7   global.System.String ADVIEWER.DAL.Message.Text**  `[get],[set]`

No Metadata Documentation available.

The documentation for this class was generated from the following file:

    *No Metadata Documentation available.*

### 5.46.1 Detailed Description

No Metadata Documentation available.

### 5.46.2 Constructor & Destructor Documentation

#### 5.46.2.1 ADVIEWER.DAL.ModelContainer.ModelContainer ( ) `[inline]`

Initializes a new ModelContainer object using the connection string found in the 'ModelContainer' section of the application configuration file.

#### 5.46.2.2 ADVIEWER.DAL.ModelContainer.ModelContainer ( string *connectionString* ) `[inline]`

Initialize a new ModelContainer object.

#### 5.46.2.3 ADVIEWER.DAL.ModelContainer.ModelContainer ( EntityConnection *connection* ) `[inline]`

Initialize a new ModelContainer object.

### 5.46.3 Member Function Documentation

#### 5.46.3.1 void ADVIEWER.DAL.ModelContainer.AddToAdvertisementMessages ( AdvertisementMessage *advertisementMessage* ) `[inline]`

Deprecated Method for adding a new object to the AdvertisementMessages EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

#### 5.46.3.2 void ADVIEWER.DAL.ModelContainer.AddToAdvertisments ( Advertisment *advertisment* ) `[inline]`

Deprecated Method for adding a new object to the Advertisments EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

#### 5.46.3.3 void ADVIEWER.DAL.ModelContainer.AddToContactMessages ( ContactMessage *contactMessage* ) `[inline]`

Deprecated Method for adding a new object to the ContactMessages EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

#### 5.46.3.4 void ADVIEWER.DAL.ModelContainer.AddToGroups ( Group *group* ) `[inline]`

Deprecated Method for adding a new object to the Groups EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

**5.46.3.5  void ADVIEWER.DAL.ModelContainer.AddToKeyWords ( KeyWord *keyWord* )**  `[inline]`

Deprecated Method for adding a new object to the KeyWords EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

**5.46.3.6  void ADVIEWER.DAL.ModelContainer.AddToMessages ( Message *message* )**  `[inline]`

Deprecated Method for adding a new object to the Messages EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

**5.46.3.7  void ADVIEWER.DAL.ModelContainer.AddToPayments1 ( Payment *payment* )**  `[inline]`

Deprecated Method for adding a new object to the Payments1 EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

**5.46.3.8  void ADVIEWER.DAL.ModelContainer.AddToRates ( Rate *rate* )**  `[inline]`

Deprecated Method for adding a new object to the Rates EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

**5.46.3.9  void ADVIEWER.DAL.ModelContainer.AddToStateCities ( StateCity *stateCity* )**  `[inline]`

Deprecated Method for adding a new object to the StateCities EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

**5.46.3.10  void ADVIEWER.DAL.ModelContainer.AddToTickets1 ( Ticket *ticket* )**  `[inline]`

Deprecated Method for adding a new object to the Tickets1 EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

**5.46.3.11  void ADVIEWER.DAL.ModelContainer.AddToUsers ( User *user* )**  `[inline]`

Deprecated Method for adding a new object to the Users EntitySet. Consider using the .Add method of the associated ObjectSet<T> property instead.

### 5.46.4  Property Documentation

**5.46.4.1  ObjectSet<AdvertisementMessage> ADVIEWER.DAL.ModelContainer.AdvertisementMessages**  `[get]`

No Metadata Documentation available.

**5.46.4.2  ObjectSet<Advertisment> ADVIEWER.DAL.ModelContainer.Advertisments**  `[get]`

No Metadata Documentation available.

**5.46.4.3  ObjectSet<ContactMessage> ADVIEWER.DAL.ModelContainer.ContactMessages**  `[get]`

No Metadata Documentation available.

**5.46.4.4 ObjectSet**<**Group**> **ADVIEWER.DAL.ModelContainer.Groups** `[get]`

No Metadata Documentation available.

**5.46.4.5 ObjectSet**<**KeyWord**> **ADVIEWER.DAL.ModelContainer.KeyWords** `[get]`

No Metadata Documentation available.

**5.46.4.6 ObjectSet**<**Message**> **ADVIEWER.DAL.ModelContainer.Messages** `[get]`

No Metadata Documentation available.

**5.46.4.7 ObjectSet**<**Payment**> **ADVIEWER.DAL.ModelContainer.Payments1** `[get]`

No Metadata Documentation available.

**5.46.4.8 ObjectSet**<**Rate**> **ADVIEWER.DAL.ModelContainer.Rates** `[get]`

No Metadata Documentation available.

**5.46.4.9 ObjectSet**<**StateCity**> **ADVIEWER.DAL.ModelContainer.StateCities** `[get]`

No Metadata Documentation available.

**5.46.4.10 ObjectSet**<**Ticket**> **ADVIEWER.DAL.ModelContainer.Tickets1** `[get]`

No Metadata Documentation available.

**5.46.4.11 ObjectSet**<**User**> **ADVIEWER.DAL.ModelContainer.Users** `[get]`

No Metadata Documentation available.

5.49 ADVIEWER.BAL.PublicFunctions Class Reference

PublicFunctions.

Classes

- struct Wight

    Wight.

Static Public Member Functions

- static AssignorClass MakeAssignor< EntityClass, AssignorClass > (EntityClass EntityObject)

    MakeAssignor.
- static AssignorAdvertisment[ ] GetLast9Advs ()

    GetLast9Advs.
- static DataTable ToDataTable< T > (List< T > items)

ToDataTable.

- static AssignorStateCity[] GetStatesAndCities ()

    GetStatesAndCities.

- static AssignorAdvertisment[] GetAdvByStateID (int ID)

    GetAdvByStateID.

- static List
  < StateAndCitiesForReapeater > GetStatesWithCities ()

    GetStatesWithCities.

- static string SolarDateConvertor (object InputDate, int Mode=2, string type="")

    SolarDateConvertor.

- static AssignorComment[] GetAdvComments (int AdvID)

    GetAdvComments.

- static void SetComment (int AdvID, string Text, string Email, int UserID)

    SetComment.

- static AssignorAdvertisment[] SortByRate (AssignorAdvertisment[] AdvList)

    SortByRate.

5.49.1 Detailed Description

PublicFunctions.

This Class is For Bublic Function

5.49.2 Member Function Documentation

5.49.2.1 static AssignorAdvertisment [] ADVIEWER.BAL.PublicFunctions.GetAdvByStateID (int *ID*) `[inline]`, `[static]`

GetAdvByStateID.

This get id of state after that return list of ad of that state

5.49.2.2 static AssignorComment [] ADVIEWER.BAL.PublicFunctions.GetAdvComments (int *AdvID*) `[inline]`, `[static]`

GetAdvComments.

this get id of ad after that return list of comment that has that ad_id and is confirmed

5.49.2.3 static AssignorAdvertisment [] ADVIEWER.BAL.PublicFunctions.GetLast9Advs ( ) `[inline]`,`[static]`

GetLast9Advs.

this function return last nine adv for home page

5.49.2.4 static AssignorStateCity [] ADVIEWER.BAL.PublicFunctions.GetStatesAndCities ( ) `[inline]`,`[static]`

GetStatesAndCities.

This return of state and cities

5.49.2.5 static List<StateAndCitiesForReapeater> ADVIEWER.BAL.PublicFunctions.GetStatesWithCities ( ) `[inline],[static]`

GetStatesWithCities.

return list of StateAndCitiesForReapeater that contains a state and its cities

5.49.2.6 static AssignorClass ADVIEWER.BAL.PublicFunctions.MakeAssignor< EntityClass, AssignorClass > (EntityClass *EntityObject* **)** `[inline],[static]`

MakeAssignor.

get an object, copy its data in assignor object and return it.

5.49.2.7 static void ADVIEWER.BAL.PublicFunctions.SetComment (int *AdvID,* **string** *Text,* **string** *Email,* **int** *UserID* **)** `[inline],[static]`

SetComment.

this function set a comment in DB in Comment table

5.49.2.8 static string ADVIEWER.BAL.PublicFunctions.SolarDateConvertor (object *InputDate,* **int** *Mode =* 2*,* **string** *type =* " " **)** `[inline],[static]`

SolarDateConvertor.

This function convert date to solar date D = X TY = x p = x x

D = // d = // W = // M =   H = :

5.49.2.9 static AssignorAdvertisment [ ] ADVIEWER.BAL.PublicFunctions.SortByRate (AssignorAdvertisment[] *AdvList* **)** `[inline],[static]`

SortByRate.

This return best ads for showing in home oage of website

5.49.2.10 static DataTable ADVIEWER.BAL.PublicFunctions.ToDataTable< T > (List< T > *items* **)** `[inline], [static]`

ToDataTable.

return data table of list. data table columns are the properties of List template.
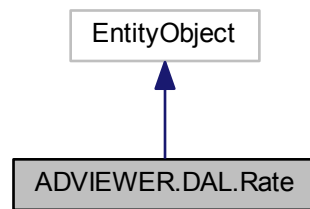

The documentation for this class was generated from the following file:
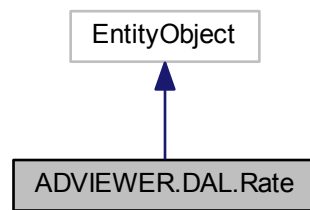

- BAL/PublicFunctions.cs

5.50 ADVIEWER.DAL.Rate Class Reference

No Metadata Documentation available.

Inheritance diagram for ADVIEWER.DAL.Rate:

Collaboration diagram for ADVIEWER.DAL.Rate:

Static Public Member Functions

- static Rate CreateRate (global::System.Int32 id, global::System.Int32 advertismentId, global::System.Single value)

  Create a new Rate object.

Properties

- global::System.Int32 ID `[get, set]`

  No Metadata Documentation available.
- global::System.Int32 AdvertismentId `[get, set]`

  No Metadata Documentation available.
- Nullable< global::System.Int32 > UserId `[get, set]`

  No Metadata Documentation available.
- global::System.Single Value `[get, set]`

  No Metadata Documentation available.
- Advertisment Advertisment `[get, set]`

  No Metadata Documentation available.
- EntityReference< Advertisment > AdvertismentReference `[get, set]`

  No Metadata Documentation available.

- User User `[get, set]`
    - *No Metadata Documentation available.*
- EntityReference< User > UserReference `[get, set]`
    - *No Metadata Documentation available.*

5.50.1 Detailed Description

No Metadata Documentation available.

5.50.2 Member Function Documentation

5.50.2.1 static **Rate ADVIEWER.DAL.Rate.CreateRate (** global::System.Int32 *id,* global::System.Int32 *advertismentId,* global::System.Single *value* **)** `[inline],[static]`

Create a new Rate object.

Parameters

id	Initial value of the ID property.
advertismentId	Initial value of the AdvertismentId property.
value	Initial value of the Value property.

5.50.3 Property Documentation

5.50.3.1 **Advertisment ADVIEWER.DAL.Rate.Advertisment** `[get],[set]`

No Metadata Documentation available.

5.50.3.2 **global.System.Int32 ADVIEWER.DAL.Rate.AdvertismentId** `[get],[set]`

No Metadata Documentation available.

5.50.3.3 **EntityReference<Advertisment> ADVIEWER.DAL.Rate.AdvertismentReference** `[get],[set]`

No Metadata Documentation available.

5.50.3.4 **global.System.Int32 ADVIEWER.DAL.Rate.ID** `[get],[set]`

No Metadata Documentation available.

5.50.3.5 **User ADVIEWER.DAL.Rate.User** `[get],[set]`

No Metadata Documentation available.

5.50.3.6 **Nullable<global.System.Int32> ADVIEWER.DAL.Rate.UserId** `[get],[set]`

No Metadata Documentation available.

5.50.3.7 **EntityReference<User> ADVIEWER.DAL.Rate.UserReference** `[get],[set]`

No Metadata Documentation available.

5.50.3.8 global.System.Single ADVIEWER.DAL.Rate.Value `[get],[set]`
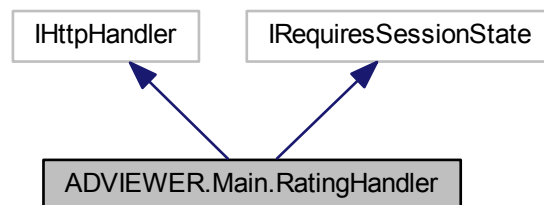

No Metadata Documentation available.

The documentation for this class was generated from the following file:

Inheritance diagram for ADVIEWER.Member.RecieveMessagesInbox:
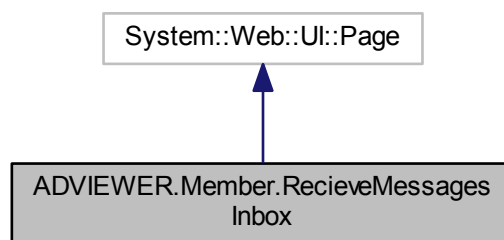

Collaboration diagram for ADVIEWER.Member.RecieveMessagesInbox:
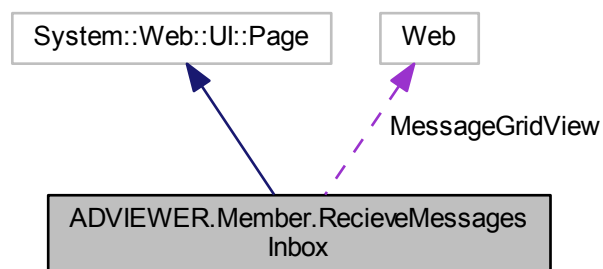

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.WebControls.GridView MessageGridView

  MessageGridView control.

5.52.1 Member Data Documentation

5.52.1.1 global.System.Web.UI.WebControls.GridView ADVIEWER.Member.RecieveMessagesInbox.MessageGridView `[protected]`

MessageGridView control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:
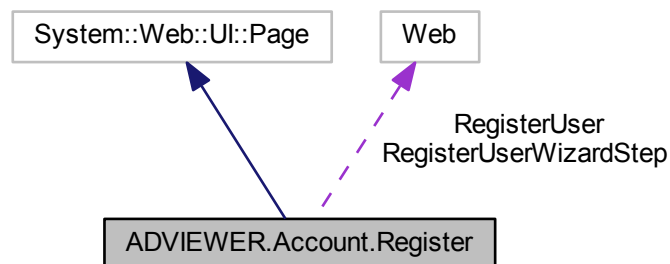

- Member/RecieveMessagesInbox.aspx.cs
- Member/RecieveMessagesInbox.aspx.designer.cs

5.53 ADVIEWER.Account.Register Class Reference

Inheritance diagram for ADVIEWER.Account.Register:
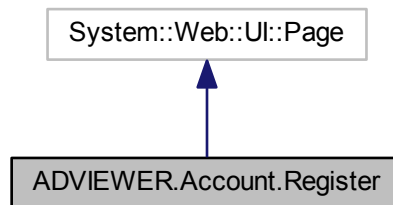

Collaboration diagram for ADVIEWER.Account.Register:

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)
- void **RegisterUser_CreatedUser** (object sender, EventArgs e)
- void **setErrorStyle** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.WebControls.CreateUserWizard RegisterUser

  RegisterUser control.

- global::System.Web.UI.WebControls.CreateUserWizardStep RegisterUserWizardStep

  RegisterUserWizardStep control.

5.53.1 Member Data Documentation

5.53.1.1 global.System.Web.UI.WebControls.CreateUserWizard ADVIEWER.Account.Register.RegisterUser `[protected]`

RegisterUser control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.53.1.2 global.System.Web.UI.WebControls.CreateUserWizardStep ADVIEWER.Account.Register.RegisterUserWizardStep `[protected]`

RegisterUserWizardStep control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Account/Register.aspx.cs
- Account/Register.aspx.designer.cs

5.54 ADVIEWER.Rss Class Reference

```

Public Attributes

- string **MessageText**

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.HtmlControls.HtmlGenericControl Div1

    Div1 control.

5.76.1 Member Data Documentation

5.76.1.1 global.System.Web.UI.HtmlControls.HtmlGenericControl ADVIEWER.Member.ViewMessage.Div1 `[protected]`
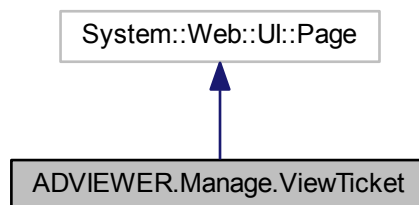

Div1 control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Member/ViewMessage.aspx.cs
- Member/ViewMessage.aspx.designer.cs

5.77 ADVIEWER.Manage.ViewTicket Class Reference

Inheritance diagram for ADVIEWER.Manage.ViewTicket:

Collaboration diagram for ADVIEWER.Manage.ViewTicket:

Public Attributes

- string **TicketTitle**

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)
- void **sendButton_Click** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.HtmlControls.HtmlGenericControl txt

    txt control.

- global::System.Web.UI.WebControls.TextBox AnswerTextBox

    AnswerTextBox control.

- global::System.Web.UI.WebControls.Button sendButton

    sendButton control.

5.77.1 Member Data Documentation

5.77.1.1 global.System.Web.UI.WebControls.TextBox ADVIEWER.Manage.ViewTicket.AnswerTextBox `[protected]`

AnswerTextBox control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.77.1.2 global.System.Web.UI.WebControls.Button ADVIEWER.Manage.ViewTicket.sendButton `[protected]`

sendButton control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.77.1.3 global.System.Web.UI.HtmlControls.HtmlGenericControl ADVIEWER.Manage.ViewTicket.txt `[protected]`
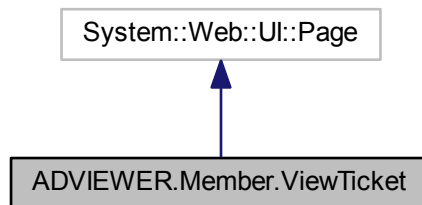

txt control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Manage/ViewTicket.aspx.cs
- Manage/ViewTicket.aspx.designer.cs

5.78   ADVIEWER.Member.ViewTicket Class Reference

Inheritance diagram for ADVIEWER.Member.ViewTicket:

Collaboration diagram for ADVIEWER.Member.ViewTicket:

Public Attributes

- string **TicketTitle**

Protected Member Functions

- void **Page_Load** (object sender, EventArgs e)

Protected Attributes

- global::System.Web.UI.HtmlControls.HtmlGenericControl answerdatediv

    answerdatediv control.
- global::System.Web.UI.HtmlControls.HtmlGenericControl ticketAnswer

    ticketAnswer control.

5.78.1 Member Data Documentation

5.78.1.1 global.System.Web.UI.HtmlControls.HtmlGenericControl ADVIEWER.Member.ViewTicket.answerdatediv `[protected]`

answerdatediv control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

5.78.1.2 global.System.Web.UI.HtmlControls.HtmlGenericControl ADVIEWER.Member.ViewTicket.ticketAnswer `[protected]`

ticketAnswer control.

Auto-generated field. To modify move field declaration from designer file to code-behind file.

The documentation for this class was generated from the following files:

- Member/ViewTicket.aspx.cs
- Member/ViewTicket.aspx.designer.cs

5.79 ADVIEWER.BAL.PublicFunctions.Wight Struct Reference

Wight.

Collaboration diagram for ADVIEWER.BAL.PublicFunctions.Wight:

Public Attributes

- double **wr**
- AssignorAdvertisment **adv**

5.79.1 Detailed Description

Wight.

This struct has just 2 args double wr and AssignorAdvertisment adv that adv is object of AssignorAdvertisment

The documentation for this struct was generated from the following file:

- BAL/PublicFunctions.cs
